

## What is it?

This initiative will put an issue before Toledo voters to amend the city charter to include Rights of Nature legislation. It will allow citizens to defend our lake against polluters.

## What does it do?

It will put the power back into the hands of the people.

It will hold corporations accountable for the pollution that they create.

This will ensure the health of the lake for generations, no matter what man made threat it may face

the

# LAKE ERIE

Bill of Rights

## Who does it help?

This initiative will protect private citizens from industrial dumping, small businesses who rely on clean water to thrive, and family farms who are already fighting against large scale agricultural operations

## What can I do?

We are all volunteers and cannot do this without the help of Toledo citizens.

We need active petitioners to commit to a few hours a week gathering signatures.

If you can help fight for your water, please contact us.
